

Java Developer With 5 Years of Experience

Experience Summary

Working Experience of Core Java, Advanced Java, SQL. Currently I am working as a developer and in the project for Walgreens. Seeking a challenging career in development domain as developer, that utilizes my experience.

Working Knowledge and Proficiency:

- Offshore-On-site coordination.
- Project Estimates
- Handling of client calls and verification of the code changes as per business requirement.
- Code development in Core and Advanced Java.
- Root cause analysis for production bugs raised by end user.
- Analyzing the requirement with Business/other team members and then preparing the high level design.
- Prepare Knowledge Transition package for inducting trainees in the project.
- Checking the coding standards.
- Technical documentation and Handbook preparation.
- Proficient to work on Eclipse.
- Worked in waterfall model and agile model.
- Code development includes unit testing, checklists, UTC, UTR.

Technological Expertise

Below is a list of important hardware, software products, tools and methods that I have worked with.

Technology: Core Java, Servlet, Jsp, SQL, Jdbc, Hibernate, Spring MVC, JDBC, JSON, Maven, MailAPI, Log4j

Products/Tool/Process: Eclipse Luna, Websos, Bamboo, SQL Developer, Agile, Waterfall, Adm, Jdk1.5/1.6/1.7/1.8

Database: Oracle 10G, MySql, Postgresql

Academic Qualifications: B.Tech in Electronics and Communication Engineering

Key Projects:

Projects	Valpo Return Center, Central RLS, Hubble Report, WAG Report
Description	Valpo Return center is an application of returning items and financial transitions to the vendor. Hubble and WAG report both applications generated reports related to stores items in the distribution centers.
Role	Developer
IT Skills/ Technology	<ul style="list-style-type: none"> ● Handling of client calls and verification of the code changes as per business requirement. ● Developing the code and maintain the functionality. ● Root cause analysis for production bugs raised by end user or customer care centres and provide those workarounds within defined SLA. ● Tweaking the system to support the business users' needs. ● Prepare Knowledge Transition package for inducting trainees in the project. ● Checking the coding standards.
Tools	<ul style="list-style-type: none"> ● Eclipse, SQL developer
Responsibilities	<ul style="list-style-type: none"> ● Offshore-On-site coordination. ● Project Estimates ● Handling of client calls and verification of the code changes as per business requirement. ● Technical documentation preparation. ● Preparing various daily and weekly reports.
Work Location	Noida, India

Ekadmic: This application also has major modules like registration, login, search, download results, Examination dates, Time tables and many modules.

Responsibilities:

- Development of all the modules
- Involved in creation of technical specification document.
- Worked as lead resource for this application
- Involved in development activities

Languages/Tools used: Servlet, jsp, Java script, Eclipse

Vmailer: In this project user can send and receive emails. User can also archive and permanently delete the email. This application also has major modules like registration and login.

Responsibilities:

- Development of all the modules Read, Send, Archive and Delete
- Involved in creation of technical specification document.
- Worked as lead resource for this application
- Involved in development activities

Languages/Tools used: Servlet, jsp, Java script, Eclipse and Various Core Java Projects
