Developed task scheduler program to run every night to send email to internal departments based on the information pulled from database using .net 3.5 and c#. Defects fixing Technical Support

RAS Girtas, Qatar: Document Management System (DMS)

Role: Technical Support

Ras Girtas Power Plant is a Power generation and water desalination plant located in Ras Laffan, Qatar. They maintain a large volume of documents which is replicated across their departments. The incoming documents will be sent for approval to the respective department heads. This leads to the duplication of files in all the departments. In order to avoid the duplication they need a SharePoint Site in which we can maintain the documents without duplication based on permissions.

Responsibilities: Communicate and train client's problems via phone, email, live chat and face-to-face meetings. Acts as a consultant and offers solutions for client problems. Prepare accurate and timely reports. Logging and keeping records of customer/employee queries. Analyzing call logs so you can spot common trends and underlying problems.

Technip: Tender System

Role: Software Developer

The Commercial function is responsible for the preparation of the project tender, tracking of the current project position during execution to project close-out activities. During this process a large quantity of both documents and data (information) will be created, submitted for approval/review, tracked and stored by the Commercial function. The information is also used by other functions/stakeholders within the business.

Responsibilities: Development (Custom Web parts, Sub sites), Deployment and implementation of application. Consistently meets and exceeds daily goals with attention to detail. Implemented approval and denial requirements using Application workflows - part of SharePoint Designer 2013. Developed task scheduler program to run every night to send email to internal departments based on the information pulled from database using .net 3.5 and c#. Defects fixing Technical Support.
